Subject: Fw: CES Update - non-routine analysis by SIM
Date: Monday, October 27, 2014 5:41:52 PM

Beth:
This is the current status. Kristie is still looking.

Thanks

Subject: CES Update - non-routine analysis by SIM
Gary,

I wanted to provide you with a quick update on CES and the additional non-routine analyses that we discussed on Friday. As of right now, neither Accutest or Test America in Houston are capable of performing the 8270 SIM analyses on the parameters that were indicated (hexachlorobenzene and 2,4-dinitrotoluene on one sample; and chlordane, heptachlor, and heptachlor epoxide on a second sample). Both of these labs are set up for routine PAHs by 8270 SIM, but not any parameters beyond that standard list. I am waiting to hear back from ALS. I have also asked that Accutest, Test America, ALS, and Eurofins look for labs outside of Houston (and within their network) that may be able to provide this non-routine analysis.

I will keep you posted as I get additional information.

Thanks,

Kristie
